

## Project Overview

As of April 27, 2012

## Fairwood Avenue, Watkins Road to Koebel Road

Existing intersection of Fairwood Avenue & Watkins Road

**Description and Benefits:** Project will reconstruct roadway and add improvements including 1.2 miles of curbs and gutters for better drainage, 1.2 miles of Operations SAFEWALKS sidewalks for safer pedestrian travel, *Americans with Disabilities Act*-compliant curb ramps, improved signals and signage, new storm system, and street lighting. The finished project will provide safer pedestrian pathways to neighborhood schools and sidewalk connectivity as well as resolve ongoing water ponding issues.

### Costs:

Design, right-of-way acquisition and utility relocation	\$493,200
Construction and inspections	\$3.3 million

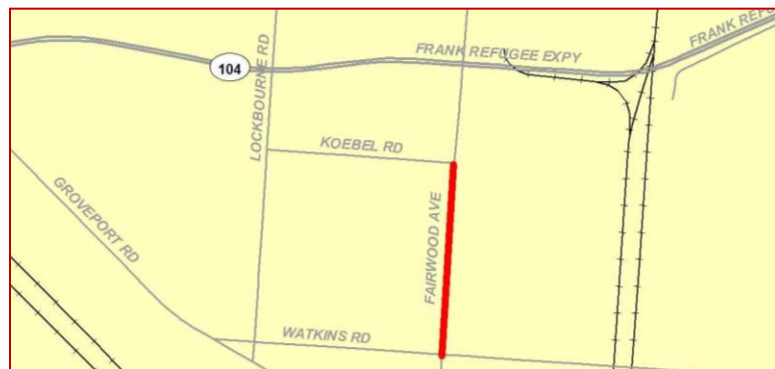

**Schedule:** Design finished in 2010; construction projected to start in late May and be completed in late November.
